

ELEVENTH RINGING REPORT

G. R. McLachlan

HON. ORGANISER RINGING

This report covers the period from July 1st 1960 to June 30th 1961. As may be seen from Schedule "A", it was a year of average activity, as far as ringing was concerned, a total of 11,398 birds being banded, almost exactly the same number as in the previous year.

Recoveries from Russia are now a commonplace event in our ringing programme and this year was no exception although only one bird, a European Swallow, was recovered. Other interesting recoveries include: a Cattle Egret ringed at Rosetta Natal as a nestling and recovered in the Katanga; a Sacred Ibis which moved from the Rand to Umbogintwini, a direction quite different from their usual migration to Barotseland. Red-bill Teal proved great wanderers once again; two with consecutive numbers flying from Rondevlei to Nababis in South West Africa while another was recovered in Southern Rhodesia 1,135 miles away. A Pochard ringed at Barberspan was also recovered in Rhodesia at Nyamandhlovu. Perhaps the most interesting recovery is the Cape Vulture found at Injazura near Umtali.

The C.S.I.R. has continued its vital financial support without which it would be almost impossible to continue the scheme. In addition we are, as always, indebted to the Director of the National Zoological Gardens for continuing to act as the central clearing house for all recoveries.

The latitude and longitude of places not mentioned before are as follows:

Birsk, Bashkirian ASSR.: 54° 53'N.; 55° 34'E.

Nababis, South West Africa: 24° 30'S.; 17° 20'E.

Bembesi, Rhodesia: 19° 25'S.; 28° 30'E.

Lake Dow, Bechuanaland: 21° 20'S.; 24° 40'E.

Pitsani, Bechuanaland: 25° 30'S.; 25° 30'E.

Maun, Bechuanaland: 20° 00'S.; 23° 25'E.

SCHEDULE A

The number of birds ringed by the various branches and larger organisations during the year were as follows:

Witwatersrand Bird Club	2,622	Northern Tvl. Bird Club	190
Natal Bird Club	615	Cape Bird Club	1,650
Rondevlei	1,958	Barberspan	503
